## Recommendation, Anthony Siokos

With this letter I would like to provide my strong and enthusiastic recommendation for **Anthony Siokos** who I have known for four years, having had the pleasure of supervising him as a student intern and then as volunteer for the Football United program that I founded and direct.

Anthony consistently produced exceptional quality work. He is very organized, focused, and has been a pleasure to work with. He has proven to possess both analytical, problem-solving skills as well as being capable of creative and innovative approaches to diverse situations. Anthony is highly committed to all activities he engages in, seeking to push boundaries and increase his competency in subject area and research capacities, and has proven to be a strong motivating force to his fellow colleagues.

Anthony consistently performs at an exceptionally high level, has a keen sense of analysis and inquiry, and presents high quality work on a consistent basis. He has a natural enthusiasm, which translates, in a teaching/mentoring situation into inspiration and engagement with both students and content, which are in my opinion two crucial qualities for teaching.

Much of the work involved in Football United is very challenging; necessitating a mix of capacity to multitask, negotiate complicated scheduling and diverse challenges related to management of our very diverse program activity scenario. Anthony always succeeds in inspiring his colleagues, volunteers and managing a large number of complicated situations with effectiveness and calm. No job is ever too hard or difficult, and Anthony always succeeds.

I am confident that Anthony will apply the same dedication to any employment situation, and can highly recommend his application be accepted. I am more than happy to be contacted for furthermore specific questions.
